INFILL/PHOT, probably as COMPUTER USERS' ORGANIZATION, is going to take over Bookmakers' publications. This will be a nonprofit educational enterprise.

At a meeting yesterday, the board expressed interest in supporting the Bally system in a big way, with a large publication.

If your interest is in good support of the Bally users, perhaps you will be encouraged by this, and join us in this effort.

We will be very interested in educational uses, medical environments, small-business uses, etc.

We will also be interested in ~~in~~ interconnecting Bally to other systems, and peripherals such as our ~~n~~ low-cost typewriter interfaces (hobbyist projects, not products), and adapting other-system software to the Bally.

We will always be 24 or more pages, probably on the more side, plan for a 2nd Class Mailing Permit, will use pictures and headlines and professional art work.

If this interests you, let me know.

Incidentally, we have booths arranged for PERCOMP '78 and NCC, and plan to do the same for the Sept. Computer Faire.

Yours sincerely,

Bin n Jangle
